VN Range

Small recorder, perfect form.

The affordable VN range of digital notetakers combines renowned Olympus recording and playback quality with outstanding versatility. These digital notetakers are ideal for anyone who wants a convenient way to save their thoughts without the need for pen and paper. The VN series makes sure that when you take a note, you can take it easy!

VN-5500

No matter where or when your best ideas occur, the stylish and compact VN-5500 is there for you. It's perfect for everything from notetaking to recording valuable ideas or keeping to-do lists. With its many flexible features, the VN-5500 makes sure you never forget a thing.

Take it easy!

VN-5500

The VN-5500 offers unbeatable ease of use and is perfect for everyday notetaking and message recording. One large and centrally-located button provides access to the most frequently used functions, and a clear LCD displays important file information. The VN-5500 combines high recording and playback quality with outstanding versatility for exceptional value. Other features include:

- Over 300 hours' recording
- Long battery life: over 30 hours in recording mode
- 4 folders / 100 messages per folder
- Voice activation (VCVA) for hands-free use
- Index function (10 per file)

Specifications

File Management	4 folders / 100 files per folder
Erase Functions	One / All file(s)
File Move	Yes
Index Function	10 per file
Record Monitor	Yes
VCVA Recording	Yes
Mic Sensitivity	High / Low
Playback Speed Control	Yes (3 steps)
Audio Input / Output	Ear Jack, Mic Jack, Speaker

Storage / Recording Modes

Memory	512 MB
High-Quality (HQ)	20 h 05 m
Standard Play (SP)	53 h 40 m
Long Play (LP)	300 h 30 m

Power Supply / Dimensions

Power Supply	2x AAA batteries
Max. Battery Life (LR03)	30 h (Rec, SP-Mode) / 15 h (Play)
Dimension (L x W x T)	102 x 36 x 20.5 mm
Weight (incl. battery)	63 g

WS Range

Stylish and ultra-compact.

The WS range of digital voice recorders offers an elegant, ultra-compact and effective solution for today's demands. And, with a WS recorder, no extra software or cables are necessary – just plug the device directly into your computer to simply download voice files, documents or music.

WS-110 WS-210S

Ultra-slim, lightweight and super-stylish, the WS series combines versatility with impressive functionality. This range is perfectly designed to suit the needs of every modern lifestyle.

Versatility looks stylish.

These ultra-slim, lightweight devices enable you to record notes, interviews and meetings with terrific audio clarity. Plus, you can use them as USB mass storage devices. This means that no matter where you're going, presentations, images and documents can be easily taken with you. Other features include:

- Lightweight design with large LCD screen and integrated USB connector
- Direct, software-free full-speed USB connection to PC or Mac
- Choice of three or six recording qualities, including stereo recording (WS-210S)
- High quality WMA format
- Long battery life, with only one AAA battery needed

Specifications

	WS-110	WS-210S

WS-110 DNS Version

For those wanting to save time or work more conveniently, the WS-110 DNS Version bundles Dragon NaturallySpeaking 9 Recorder Edition speech recognition software to help get things done. Languages supported are EN, FR, IT, DE, ES, NL. For further information please visit www.olympus-europa.com

WS-311M WS-321M WS-331M

These recorders build on the concept of smartness and flexibility in the WS range. However they also invite you to combine business with pleasure. With the WS series you can travel light, record for longer, and take advantage of the latest audio technology to settle back and listen to your favourite tunes. It's the perfect balance for your busy life at the office, on the road or at home.

Mobile versatility: For data of all kinds.

Smart, sleek and versatile. These recorders let you capture and playback audio notes, lectures and interviews, and with their amazing memory capacities, you'll never have to worry about running out of disk space. These devices also store a variety of other digital media so that you can carry everything you need in one hand and listen to your favourite music at the same time. Features include:

- Mass Storage Device with direct software-free High-Speed USB connection to PC or Mac
- Ample memory for more than 555 hours' recording (WS-331M, 2 GB)
- Choice of six recording qualities including 3 stereo recording modes
- Large, clear backlit LCD
- WMA/MP3 music and variable-speed playback functions
- SRS "WOW" and TruBass for brilliant audio enhancement

DS Range

Next-generation technology.

The DS range is primarily aimed at business users and anyone who needs the very latest technology in audio processing. With these state-of-the-art devices, meetings, personal notes and lectures can be captured and reviewed with outstanding quality and ease.

DS-55
DS-65
DS-75

Each model features an elegant metal casing that houses advanced technology. With these recorders, file management is a breeze, and their unbeatable stereo sound quality makes them ideal for capturing every detail. But they're also great for life when you're off the job. These devices are perfect for relaxing to your favourite music, audiobooks or podcasts between appointments.

High-Quality Audio Processing.

High-Quality audio processing at your fingertips. Designed in conjunction with the RNIB*, these recorders are easy to navigate with their tactile buttons and an optional Voice Guidance feature. High storage capacity means there is plenty of room for storing dictation, music, podcasts or other recordings. In addition to high-quality recording and playback of WMA files, this range enables you to listen to MP3 and AA (audible content) files. Furthermore, the DS-75 boasts PCM recording capabilities. Features include:

- Versatile recording quality options including high-quality stereo and PCM** recording
- High storage capacities: up to 4 GB**
- USB 2.0 connection with Mass Storage Device functionality
- Audiobook (.aa), Podcast functions with bookmarking for easy stop-and-go listening
- Latest sound enhancement technology: DVM and Euphony

*RNIB: Royal National Institute for the Blind is a UK based charity offering information, support and advice to people with sight loss. **Only DS-75.

DS-2400 & AS-2400

The perfect business solution.

The Olympus DS-2400 digital voice recorder and the AS-2400 Transcription Kit are especially designed for small enterprises. This range puts you in complete control to guarantee that you never miss a thing.

DS-2400 AS-2400

The elegant DS-2400 provides maximum mobility and is ideal for every business setting. Professional one-touch operation puts you in control, and allows recordings and adjustments to be made with extraordinary ease. It features the DSSPro standard to enhance all aspects of professional dictation, including efficient file management.

For even more versatility when it comes to transcribing voice files, adding the optional AS-2400 Transcription Kit creates the perfect combination to keep your business running smoothly.

Enhance organisation and efficiency.

DS-2400

Working hand in hand with the DS-2400 is the AS-2400 transcription kit.

The DS-2400, with its sleek silver body, offers flexible mobility and high-performance recording and playback. Up to 200 files can be saved in each of the device's five folders, and an SD Card slot provides more than ample storage capacity. Recordings are saved in the high-quality DSSPro format. Files can be downloaded to a PC or Mac, and then easily transferred or played back thanks to the included DSS Player software. Features include:

- Recording in Digital Speech Standard Pro (DSSPro)
- A SDHC card slot that allows almost endless recording capacity: e.g. over 157 hours recording with the supplied 1 GB SD Card
- Ergonomically designed: large backlit LCD, NEW button and three Smart Buttons
- Professional editing functions such as Insert or Overwrite dictation and Partial Erase
- User ID setting possible via software

Specifications

PC-Interface	Hi-Speed USB interface (USB Storage Class, USB AudioClass (Full Duplex), USB HID Storage Class)
File Format	DSSPro (Digital Speech Standard Pro)
File Management	5 folders / 200 files per folder, Pending File, Individual Folder Names
Erase Functions	One / All file(s) / Partial Erase / File Lock
Index Function	32 per file
VCVA Recording	Yes
Insert / Overwrite Dict	Yes / Yes
Voice Filter / LowCut Filter	Yes / Yes
Mic Sensitivity	Dict / Conf
Playback Speed Control	Fast / Slow
Quick Review / Cue Review	Yes / Yes
Audio Input/Output	Ear Jack, Mic Jack, Speaker
Other Features	DSS Player Standard Software

Storage / Recording Modes

Memory	SDHC Card Slot (1 GB SD Card supplied)
Quality Play (QP)	77 h 00 m (1 GB)
Standard Play (SP)	157 h 50 m (1 GB)

Power Supply / Dimensions

Power Supply	2x AAA batteries
Max. Battery Life (LR03)	32 h (Rec, SP Mode) / 13 h (Play)
Dimension (L x W x T)	113.5 x 50 x 17 mm
Weight (incl. battery)	105 g

AS-2400 Transcription Kit

The AS-2400 guarantees easy transcriptions of any DSSPro recordings. It allows easy transfer from the voice recorder to the secretary's office. Data can be labelled according to importance or priority and files can be viewed at any time. It is supplied with a headset and footswitch. USB and serial adapter cable are also included.

For box contents information and accessories please check page 30.

DSS Player Software

DSS Player Software is the perfect tool for downloading and organising the playback of audio files on a computer. The software manages DSSPro, DSS, WAV, WMA, and MP3

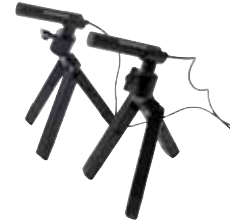

audio files. For an easy transcription process the software features e.g. Author ID Setting, Intro Scan and Playback Speed Control.

An upgrade to DSS Player Plus version will offer the opportunity to integrate voice recognition software and is available to download online. For Olympus voice recorders with podcast functionality (e.g. DS-75 / DS-65 / DS-55) the DSS Player Software manages to subscribe, download and organise podcasts.

Please visit our website to download, and for compatibility information.

ME-30W Conference Kit

For meetings, conferences and concerts, with the ME-30W Conference Kit, it is easier than ever to capture sounds in large gatherings, all in high quality stereo. This professional solution includes two omni-directional microphones engineered by Olympus for seamless compatibility. With 360° coverage, you'll never miss a contribution – no matter where the speaker is sitting. The ME-30W Conference Kit is compatible with Olympus Digital Voice Recorders which have a stereo function, particularly recommended for use with the DS-75.

DS-75/-65/-55. Easily converts
to a table-top stand

Remote Control

RS-29 Remote control

Alarm Playback. The alarm tone of the recorder sounds at the scheduled time and by pressing any button the recorder starts to playback a preselected file.

Continuous Playback. This function allows you to listen to all your recordings of one folder in one go without any stop between the files.

Continuous Recording. Recording will continue onto the next recording file if the maximum file size is reached.

DSSPro (Digital Speech Standard Pro). DSSPro (.ds2) is the file format for professional dictation and transcription. Its technology reduces both the file size and transfer volume for speech recordings. Thereby DSSPro improves sound playback quality with a wider frequency range and better fidelity, ideal for speech recognition.

Index Marks. If Index marks are placed, you can quickly find a location you want to listen to.

LowCut Filter. The LowCut Filter function minimize low-frequency sounds and records voices more clearly.

MP3. Digital audio compression algorithm that achieves a high compression. It does this by optimising the compression according to the range of sound that people can actually hear.

Noise Cancel Playback. If recorded audio is difficult to understand because of noisy surroundings the noise cancel setting can improve sound quality.

PCM (Pulse-Code Modulation). PCM is an uncompressed recording format which depending on the sampling frequency and bit rate matches or beats CD quality (16bit / 44.1kHz).

Pending File. You can set-up that only finished files are transferred to the PC. Then pending files will not be transferred until their status is changed to "finished".

Repeat Playback. The recorder repeatedly plays back a by the user defined segment.

Skip Playback enables you to skip (forward) or reverse skip (rewind) a file being played for a set period (e.g.

10 sec.). This function is convenient for quickly skipping to another playback position or repeatedly playing back short phrases.

Smart Buttons. Smart buttons automatically change to displayed function depending on the mode set.

Temp Marks. Unlike index marks temp marks can be placed to temporarily remember desired locations on files created on machines other than Olympus IC recorders.

Timer Recording. Timer recording is a function to execute a recording at a set time.

USB. USB offers faster data transfers at 1.5 Mbps (Low-speed), 12 Mbps (full-speed or USB 1.1) or 480 Mbps (high-speed or USB 2.0).

USB Audio Class compatibility means that the digital voice recorder also functions via the computer as USB microphone or loudspeaker.

With USB Mass Storage Class, the device is automatically displayed as an external drive.

VCVA (Variable Control Voice Actuator). When the microphone senses that sound has reached a preset volume, the built-in VCVA starts recording automatically, and stops it when the volume drops.

Voice Filter. The Voice Filter Function cuts low and high frequency tones during normal, fast, or slow playback, and enables clear audio playback.

WAV. A audio format which is compatible with Windows and MAC operating systems and typically used for uncompressed audio recordings like PCM.

WMA. Windows Media audio file (WMA) is a compression standard that archives CD quality at only half the size of comparable MP3 files.

Zoom Mic / DVM technology. The directional microphone function utilises DiMAGIC Virtual Microphone (DVM) technology. DVM is an audio pickup system which allows you to record by focusing on sound from any direction (Zoom, Narrow, Wide).
